What was left out of these numbers

Removed	Items	Why
Executive Announcements	353	Announcements, not reference material
Software Updates	6	Nano release notes; superseded by current guides
Canopy Best Practices: 2023 emails	12	Older tip emails; 2025–26 kept
Recommended Watching	10	General-interest YouTube videos
HR, Payroll, LO Website pages	14	Already moved to the Hub
Rate sheet folder	1	Rate sheets go stale
Total left out	**396**	

Without exclusions: ~1,314 items (866 linked directly plus 448 inside folders).
Also not counted: 7 Drive folders we can't open (Processors 3, Underwriters 2, Specialists 1, Canopy Best Practices 1), and the Marketing Canva site. Their size is unknown.

Links, not items: 294 outside web links (lender portals etc.) stay as links · 77 page-to-page links · 31 email addresses · 6 calendar and 4 Canva links. None are items to move.

Notes: counts are estimates. Items inside folders have no IDs, so an item linked directly and also inside a folder may count twice. Folders were read up to 3 levels deep. "Already in the Hub" covers only pages matched as moved; individual items already uploaded to the Hub (107) weren't matched one by one. Excluding the 2023 tip emails and the announcement archive is a judgement call. Per-link detail: mvp_scope.csv.
